Dear Madam:

Pursuant to 37 C.F.R. § 1.97 and § 1.98, Applicants submit for consideration in the above-identified application the document listed on the attached Form PTO/SB/08a/b. A copy of the document is also submitted herewith. The Examiner is requested to consider and make this document of record.

The document is a Second Amended Claim Construction Order from *Scantibodies Laboratory, Inc. v. Immutopics, Inc.*, at the United States District Court for the Central District of California, Case No. CV 04-08871 MRP (MANx), now appealed as Case No. 2008-1522 at the United States Court of Appeals for the Federal Circuit. This litigation involves U.S. Patent No. 6,689,566. The present application is a Continuation-in-Part of U.S. Patent No. 6,743,590, which is a Continuation-in-Part of U.S. Patent No. 6,689,566. Scantibodies Laboratory, Inc. is the Patent Owner of U.S. Patent No. 6,689,566 and the assignee of the present application.

The Court vacated the previous claim construction order and reached the following construction of terms:

1. “Specific for” is defined as having a measurable affinity for and detectable binding to an epitope having at least four amino acids of the seven in SEQ ID NO: 3. In addition, the affinity is higher than the affinity for any other epitope of the whole PTH sequence.

2. “Specifically binds to whole parathyroid hormone” means having a measurable affinity for and detectable binding to whole parathyroid hormone.

3. “Does not specifically bind to an interfering non-(1-84) parathyroid hormone fragment” means having no measurable affinity for and no detectable binding to an interfering non-(1-84) parathyroid hormone fragment.

4. “Not detecting an interfering non-(1-84) parathyroid hormone fragment” is construed to mean having no detectable binding to an interfering non-(1-84) parathyroid hormone fragment.
